

## SAAS ENABLED ROOFING SOFTWARE

### PROJECT DESCRIPTION

We have developed a solution for the roofing industry which features roofing companies to manage sales, marketing and roofing estimation. The software is mainly developed for roofing industry contractors.

### RIGEL NETWORKS' RESPONSIBILITIES

We have developed software which includes scheduling, contact management, sales management, Roofing product management, customer center, Online Bid generation for roofing, and Marketing modules. The software can also be used as a product by various roofing companies. Technologies: C#, ASP.Net, ADO.Net, SQL 2000, AJAX, Crystal Reporting Service, Java Script.

Key Challenges	Rigel's Solution	Customer Benefit
Auto Bidding Algorithm	Rigel has implemented algorithm to calculate bid Generation, Product Import and amount generation using company financial details	Customer benefited by less data entry and manual calculation for bid amount
Auto Product Import	Rigel has implemented algorithm to import product with other details	Customer is benefited by automated import process from less data entry and details verification manual job.
